Summary

MIS (Management Information Systems) Executive and B.Sc. IT graduate who turns raw business data into accurate reports and interactive **Power BI dashboards** using **Excel, SQL and Python (Pandas)**. Built **15+** hands-on data analytics and machine learning projects across retail, transportation, insurance, sports, public health and entertainment, including an **end-to-end API-to-Power BI pipeline**. Seeking Data Analyst and MIS & Reporting roles focused on data accuracy and clear insights.

Professional Experience

Luthra Projects

Jun 2026 – Present

MIS Executive

Vasai-Virar (On-site)

- Prepare recurring **MIS reports** in **Excel (PivotTables, VLOOKUP)** and MS Office for stakeholders.
- Validate business data using **Excel and Power Query** to support accurate MIS reporting.
- Build and maintain **Power BI dashboards** that turn operational data into decision-ready visuals.
- Use GPT and Claude AI to speed up report drafting and documentation.

My Magical Trip

Jan 2025 – Dec 2025

Data Entry Specialist

- Maintained accurate operational records, building a foundation in **structured business data**.

Selected Projects

Movie Analyzer Dashboard (Flagship End-to-End Project) | *Python, Pandas, TMDB API, IMDb, Power BI*

- Collected movie data via the **TMDB API** and IMDb datasets, then cleaned and merged it with **Pandas**.
- Performed **EDA and financial analysis**, built a data model and an **interactive Power BI dashboard**.

Insurance Data Analysis | *Python, Pandas*

- Analyzed **1,340 policyholders** (demographic, health, behavioral) to find patterns in claims and claim amounts.

Shopping Trends Business Analysis | *Python, EDA*

- Retail-sales EDA on customer behavior, spending trends and purchasing patterns tied to sales performance.

Taxi Trips Analysis | *Python, Pandas*

- Analyzed fare composition, ride duration vs. cost, payment methods and time/location demand patterns.

IPL Cricket Analytics (2008–2022) | *Python, Pandas, Seaborn*

- Used match and ball-by-ball data to surface player performance, team trends and season-wise insights.

Autonomous Car Simulation (Final-Year Project) | *Unity ML-Agents, Reinforcement Learning*

- Trained a driving agent in a **Unity** city environment using ray-based observations and checkpoint logic.

More projects (COVID-19, FIFA World Cup, Air Pollution, Snake AI and others): github.com/Amit-1216

Technical Skills

Core Analytics: Python, Pandas, NumPy, SQL, Advanced Excel (PivotTables, VLOOKUP), Power BI, Power Query

Visualization & Reporting: Power BI dashboards, Matplotlib, Seaborn, MIS reporting, data storytelling

Databases: Oracle SQL, DBMS and relational concepts, joins, aggregation

Programming & Tools: Python, C++, C#, JavaScript, HTML, CSS, Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Capabilities: Data cleaning, data transformation (ETL with Power Query), data modeling, Exploratory Data Analysis (EDA), statistics, business analysis, problem solving

Additional Technical: Machine Learning fundamentals, Reinforcement Learning, Deep Q-Network (DQN), Unity ML-Agents, Data Structures & Algorithms

Education

B.Sc. Information Technology – Bhavan's College, Andheri West, Mumbai

2023 – 2026

University of Mumbai | 7.86 CGPA

HSC – Shankar Narayan College

90.20%

SSC – New Cambridge High School

92.80%
